IN THE SPECIFICATION:

Please rewrite the paragraph appearing at page 7, lines 12-17, as follows:

--A card interface 28 has an insertion slot for inserting a card 30 [e.g., a compact flash card (removable storage medium) on which information captured by a digital camera has been ~~stored)]~~, stored], and a connector for effecting a connection to the interior of the interface.--

Please rewrite the paragraph appearing at page 11, line 23, through page 12, line 4, as follows:

--When control proceeds to step S18 (after performance of the preliminary procedure in step S16), information is entered from the control panel and it is determined whether transmission of file information or transmission of a document image has been selected. Control proceeds to step S20 if it is determined that file transmission (transmission of an image file in the removable storage medium) has been selected ("YES" at step S18). If the decision rendered is "NO", control proceeds to step S32.--
